

PRACTICAL NO: 2

AIM: Translating any French statement into English

-----CODE-----

```
from googletrans import Translator

translator = Translator()

def translate_french_to_english(french_text):
    translation = translator.translate(french_text, src='fr', dest='en')
    return translation.text

french_statement = "Bonjour, comment allez-vous ?"

translated_text = translate_french_to_english(french_statement)
print(f"Original: {french_statement}\nTranslated: {translated_text}")
```

-----OUTPUT-----

```
Original: Bonjour, comment allez-vous ?
Translated: Good morning, how are you doing ?
```
